FOUNTAIN CENTRE IN DANGER !

Dear Friends,

Since starting the Fountain Centre, and the Fountain Journal we have received many wonderful heart warming letters from people who believe and approve of the objectives of the Centre.

We have made many friends and look forward to making many more. But we are now in DANGER, and we ask you all to think very deeply of any way in which you could help us.

For family and personal reasons our principle sponsor Mrs Margaret Tedder-Shepherd has had to withdraw from the project, and the Fountain Centre must buy her 50% share of the property "Star House" or lose the entire Fountain Centre facility. All of us who believe deeply in the importance of Fountain Centre at Warminster must unite together to save our dream from being sold on the open market.

We ask you the people we rely on and our friends to help in any way you can big or small. Please think very carefully what you could do to assist, long or short term, here and now.

Please write to:- The Fountain Centre,
Star House,
78, Portway,
Warminster,
Wiltshire.

or phone:- Warminster (code 09-852) 5423,
and ask to speak to Peter or Jane.

Fountain Journal Secure Financially
-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-

The magazine, through the kindness of author Arthur Shuttlewood, is financially secure and will continue to be published. To help raise capital we have decided to issue a 10 year magazine subscription for £40 or a life subscription for £100.

Fountains of Living Light
-o-o-o-o-o-o-o-o-o-o-o-o-

If you dwell a moment here at rest
Do you not feel
The rippling river now begin to flow?
And springs of living colour hidden here

Shine forth within you and in fulness glow?
Do you not feel
Fountains of living light their diamonds fling?
Do you not feel our world's awakening?

Fountain Centre SOS

-o-o-o-o-o-o-o-o-o-o-

Delete:- Please return this coupon if you can help?

1. Dear friends at Fountain Centre I am concerned about your possible closure and I can help in some way. I have detailed this in my attached letter which I understand you will keep in complete confidence.
2. I renew my subscription to the Fountain Journal for another 3,6,12 issues knowing the magazine will continue. I enclose £1,£2,£4.
3. I enclose a gift subscription to a friend to be sent to:-
Name.
Address.
4. I wish to subscribe for 10 years and enclose £40.
5. I wish to take out a life subscription and enclose £100.
6. I would be interested in forming a support group for Fountain Centre so helping with its expansion in Wiltshire and at other locations.
7. I have the following property/room/office/transport/equipment, which I would be prepared to loan to the Fountain Centre for a specified period:-
8. I have the following land/garden in which friends of Fountain Centre could grow and share natural organic crops:-
9. I have access to the following sites where friends could meet and hold sky watches, undisturbed.

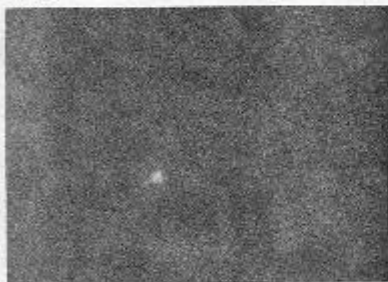

My name is:
Address :

Golden Disc Seen Low Over Elm Hill

-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-

The quantity of sightings of UFO's seen over Warminster since production of the No.2 edition of this Journal precludes listing however I would like to detail some of the more dramatic incidents.

The night of 30th June 1976 was particularly rewarding. Present at Cradle Hill were Fred Hatcher aviation designer for BAC, Author Arthur Shuttlewood, Barry Musselwhite, Sheila Meredith, Penny Stern, Peter and Jane Paget and Sheila and Helen. The evening was clear, no wind, the time 9.30pm. Fred had suggested that as there were nine people present, and Arthur added that it was the 30th of the sixth month, which adds to nine, we should try to send out thoughts out quietly and ask for some visual indication of the existence of Flying Saucers. It sounded a bit unlikely, but as we were all prepared to give it a go we stood facing North and tried the telepathy routine.

Left. Luminescent force field of UFO, photographed through a 3" telescope by Bob Strong.

As we waited over the next hour the conversation ran over other sightings and pet theories. Arthur and Jane on top form with their continuous flow of puns and jokes kept everyone amused and it was quite by surprise that around

10.30pm someone shouted, "Whats that!". Could it be that our experiment had worked, for gliding in from the North at an altitude no higher than 8000ft (Fred estimated) was a circular craft carrying clearly seen lights. Its speed was quite slow, (estimated 200/250 knots) and it undulated slightly in its flight path. No flashing anti-collision lights could be detected but through 10 X 50 glasses five white lights could be seen arranged in a square on the underside the fifth being in the centre. Also a red light ahead and below the central light. All lights were pin point and constant. Having myself seen many military aircraft over Salisbury Plain, I was certain it was not of A.L. origin.

Its body was metal grey visible in the fading light. No sound could be heard and as it flew over the copse at Cradle Hill, some quarter mile away, and banked to the West it clearly had no wings but was just a body in flight. No windows could be observed and no exhaust. A very faint sound like that of a turbine was detected by some watchers, not others, but it in no way sounded like a jet or a turbo-prop engine.

Later in the evening we returned to Star House and sat chatting in the paddock under a star spangled sky. The occasional satellite passed over. Then without warning from a part of the heavens where no other object could be seen several bright pin point flashes blinked. They were very bright and of a high colour temperature, towards 5000°K. One had the impression that a directional flash gun was being used as the flashes were all of very short duration, maybe 1/1000 sec. No aircraft noise could be heard at the time or afterwards. Whatever was making the flashes was high in the sky, but much lower than an orbital object for the beam of the light could be seen in the air for a short distance from its source which was standing still.

Barry flashed three plus three plus three dots with his powerful torch and at once the signal was returned. The quickness of the response gave the impression that the process was automatic rather than manual. I have noticed this feature before and it would seem that any short sequence is faithfully returned immediately. The flashes were definitely not lightning as they were from a point, there was no cloud anyway. The chances of them being meteors also was dismissed as they all occurred at the same point. High flying aircraft don't stand still, so that was out too.

Fred having retired to the top of Star House observed the lowest of the UFO's of that week. While laying on his bed overlooking Elm Hill he saw a golden disc glide in from the West and dip towards the Golf Course, then depart Eastward. The time was 4am and the same thing happened again about 4.10am but this time going East to West.

Many people come to Warminster and see only 'satellites' However if these objects do not stop, change direction, or signal one cannot say if they are man made or not. The only point I would like to make is that many of these lights that travel
