

U.F.O. INVESTIGATORS FROM THE U.S.A.

Six investigators arrived in Torbay in December to investigate vapour trails left by U.F.O.'s. Two Eastern seaboard universities in the United States had arranged the whole affair and had despatched six atmosmegameters to Torquay - highly specialised equipment designed to pick up the vapour trails left by passing spacecraft whether you see them or not.

The atmos machines, similar to those used by electricians to test current supplies were to have been set up at strategic points in Torbay. Apparently they can designate the type of craft, its dimensions, the distance it flies from the surface and its shape. The two American universities, one in New Jersey and one in Pennsylvania, have just carried out a similar experiment in Japan and it worked there.

Torbay was chosen as the number one - indeed the only - British sighting for the experiment because of the number of reported U.F.O. sightings in the last 12 months.

Mr. Wyse of the Torquay UFO Centre advised against the men being alone on these watches as it could be dangerous and suggested they go either in two's or three's. Unfortunately before the equipment arrived from America the Torbay UFO experiment was called off - on the orders of the American President who, it is reported, heard of an American under-sheriff and his patrol man who disappeared recently after stopping to investigate a strange obelisk at the side of the road. Witnesses reported that a door opened and they completely vanished. They reappeared 48 hours later over a thousand miles away - and couldn't remember what had happened to them. So now President Carter has placed a ban on all space object investigations - and as the Torbay team was awaiting American equipment, their experiment will suffer with the others.

Olive Wyse, Vice-President of the Torquay UFO Centre told the newspaper "it does back up what we said. These disappearances have been going on in America for some time."

NEW YORK NEWSPAPER "THE WEEKLY NEWS" recently reported:

U.F.O. SETBACK

A request from President Jimmy Carter that the subject of unidentified flying objects be re-opened for study has been rejected by NASA, the space agency.

The agency said it would indeed analyse "bona fide physical evidence from credible sources," but so far none of this kind has even been put forward.

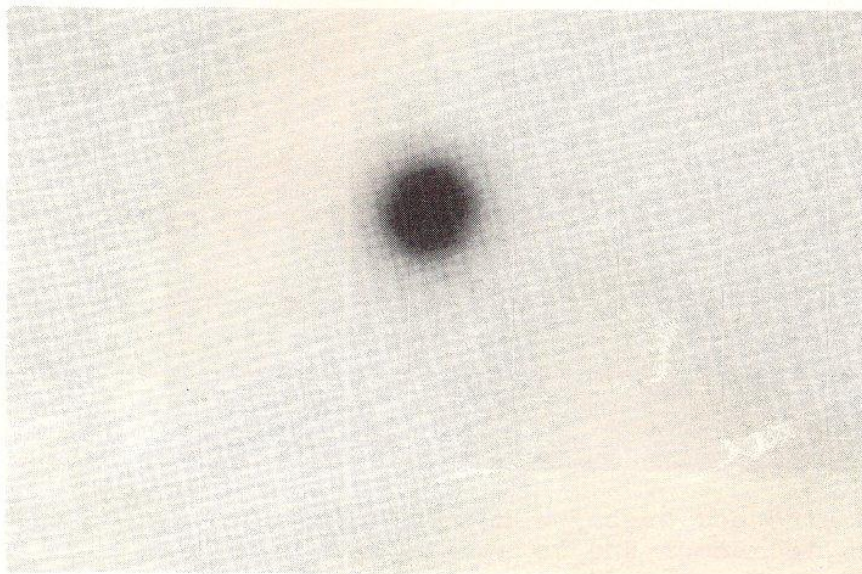

A new study would be "wasteful and probably unproductive" says NASA.

U.F.O'S AT SHALDON. NR. TEIGNMOUTH.

There have been a crop of U.F.O. sightings in the Shaldon area lately.

Mr. Eddie Mallon, the landlord of the Ferryboat Inn, was chopping wood with his son early one evening when he saw an object hurtling across the sky from North to South.

"It was extremely high up and travelling at a fantastic speed. It certainly wasn't an aircraft and I doubt that it was even a shooting star - it was gone in a matter of seconds. It looked like a very dim star but I have no idea what it was," he said.

A few days earlier a local resident was walking across the green when he saw an object with a very bright bulbous light, moving across the sky from Haldon in the direction of Torquay.

"It was very high and from experience I can say it was no aircraft. I watched it for several minutes and I have never seen anything like it before."

Winchester ReportFast Green Light

On the 7th January, approximately 12 o'clock mid-night, Mr. Ross Formhalls of 5, King's Close, Chandlers Ford, Hampshire, was travelling in his car with his friend, Mr. Colin Bishop of Heathlands Road, Chandlers Ford. They were travelling on the A31 from Ringwood to Cadnam. It was cold night and there was a low line of fog across the road. Then as they were passing the old air field of Stoney Cross, Mr. Formhall said he was concentrating on the road, when suddenly the fog turned green and before he or Mr. Bishop could say anything, a Green Ball of light came from behind them and went over the top of the car and then went out of view on the horizon in front of them.

Mr. Formhall recalls that the green ball was about the size of a cricket ball at arms length. He said "It got smaller as it went away from us and it was travelling at an estimated speed of about 3 to 4 seconds."

How Does This Grab You.

For a number of years, Sue and I have been standing around on hill tops watching for U.F.Os. We have seen many strange things in the sky, as many other people have, and on several occasions we have heard strange sounds as well. There are quite a number of people, world wide, who report hostilities, although in our experiences we have never met any, quite the reverse. We have found nothing but a feeling of love and good will from these heavenly vehicles which glide serenely across our skies.

We have heard many people scoff at what we see and hear, and say. And yet, there are many more who are in agreement with us. We ask, and have been asked. What does it all mean. So with this opportunity I would like to put forward what I believe its all about, or rather part of what its all about. I invite you the reader, whomever you may be, adults and children, to write and tell us what you think it all means. We must all respect each others opinions, and through discussion we hope to arrive at the truth.

Many years ago, in my childhood, and up untill I was seventeen years of age, I was in regular attendance at my local Sunday school and Church. As I grew older, I realized that what I was listening to meant nothing to me. In short, I just did not understand the meaning of God, Jesus, and the Bible. And so I left the Church, to lead what some people call a normal life. Then that nagging question came along. Who am I. What is life all about.

I became interested in Rocketry, and began to look at the Universe, at the same time throwing religion completely out of the window. Then the thing visited Warminster, which beset many people with thought provoking experiences. One day a minister who lived near Reading told me of Ezeekiels vision. Ezekiel Chapter one, and asked my opinion. He had been helping to finance a private project, and he asked me if I could see any similarity between the planned craft, and the thing which Ezekiel saw. Rather intrigued, I read the first Chapter of Ezekiel, and with a bemused and utterly boggled mind I realized, that, which I had thrown out the window probably did have a meaning after all.

After much searching through the Bible, my interest in U.F.Os. became serious, and now I believe there is a link. We have now had a flood of books whose authors believe in the Biblical link, and of late, films are beginning to portray this pattern. Personally I dont feel one can believe in U.F.Os and disregard the Bible, and conversly, one cannot believe in the Bible and refuse to acknowledge the existance of U.F.Os. I now believe, that, what is found in the Bible is true, and that U.F.Os are the Galactic vehicles of the Biblical Angels, Messengers, or if you wish, Extraterrestrials. Jesus said, I am not of this world, John, 8:23. and, in my Fathers house are many mansions, John, 14:2. Was he talking of other habitable planets in the universe, or was

he perhaps talking of another dimension. Windows from this one to another. Matthew, 3:16. Genesis, 7:11. Acts, 7:56. 10:11. 2 Kings, 7:2,19. Isaiah, 60:8. Malachi, 3:10.

It is written. Be hospitable to all persons, for many are those who have entertained Angels, (Extraterrestrials) and not known it. Hebrews, 13:2. This leads me to believe that our brothers from space look very much like us. We read in Hebrews, 2:7, and 9, that God made Jesus a little lower than the Angels, so there fore we assume that Extraterrestrials and man are similar, and not double headed bug eyed monsters of science fiction.

On several occasions in the past I have refused to talk to people who call at the door preaching Gods message. You may laugh, but some times I wonder if I may at some time shut the door in the face of an Extraterrestrial. I now invite them in and listen to their opinions. There are many people who believe the Angels still walk amongst us, and on one occasion in the past interbred with the human race, Genesis, 6:1, and,4. Here follows a number of references where I feel U.F.Os, are at work in the Bible.

The following is an extract from the history of UFO sightings in the North East, kindly sent to us by John Minto. If anyone would like further details write to John Minto, 10 Windermere Avenue, Garden Farm Estate, Chester-Le-Street, County Durham. DH2 3DU or care of UFO-INFO. Further details from this file will be printed in later issues of this magazine.

UFO SIGHTINGS IN THE NORTH EAST by John Minto

1977 started dully for Ufologists, although the rest of the country was enjoying the "chools" sightings. However by mid 77, after the South had the Ted Pratt & Joyce Bowles contact case, we had to be content with a sighting from a lifeboat man who spotted a white glowing object which eventually flew off in the South Westerly direction. This was a signal for further UFO activity and in fact one of the best sightings ever took place during 1977.

Taxi driver Reginald Dodd is desperately trying to trace two girls he hopes will confirm that a flying saucer has flown over Durham. For 33 year-old Mr. Dodd dropped off the girls and seconds later saw what he is convinced was a flying saucer hovering above the taxi in the twilight hours of the morning. "I was driving my taxi back but I'm sure that these girls must have seen this flying saucer as well because I was very near them when I spotted it" said Mr. Dodd of Surtess Drive, Crossgate Moor, Durham.

"Suddenly this enormous brightly lit object zoomed down on me and stayed just above my windscreen."

The sighting happened at the main crossroads between the village of Pittington near Durham where the two girls live. Mr. Dodd said: "The object was chrome coloured all over and had a dome and there were four lights underneath and a big red circle underneath, the size was tremendous it had three layers of steel around it and it was saucer shaped."

Obviously, this could be a very important sighting if Mister Dood can find these two girls. Days afterwards another spectacular sighting was reported - a motor cyclist spotted a purple UFO which suddenly swooped down and all the power went from his engine, a passing motorist had the same experience, although when the UFO disappeared both engines started perfectly. This is the first ever such case in the North although they are reasonably common in other parts of the country. While I was preparing this article, I was listening to a Radio Newcastle phone in, dated 25.11.77, and 26.11.77 and several people phoned in about lights in the sky on Saturday night and eventually 15 people had confirmed the original sighting-the object was silvery in colour although no definite shape could be made out. But one caller said that she had seen the object much more clearly and it had antenna sticking out and was a clear saucer shape - the time had been 5.45 and the object had been seen as it was darting in amongst the clouds.

Over 250 reports of unidentified flying objects have reached researchers in the North East and most of them remain and will remain UNINVESTIGATED, because what is lacking in the North East is co-ordinated research, the very fact that the police print "Hoax" on a report does not mean we cannot investiage furhter. In the 1960's there was a TYNESIDE UFO GROUP which is now disbanded, if there is anybody who used to belong to that organisation could they please contact me.

Finally, although there are many sightings listed in this article many are missing because they are either too mundane or too ridiculous to print (e.g. hoaxes). If you require further information about UFO sightings please contact me, I am going to prepare a second volume when more reports are given to me. Hope that you found the article interesting about an area you hear little of in UFO circles.

"Something unknown to our understanding is visiting this planet" DR. MITROVAN ZVEREV (USSR) SANTIAGO, CHILE, AUGUST 1965.

" There is scientific evedence that strange objects are circling our planet PROF GABRIAL ALVIAL. CERRO CALAN OBSERVATORY AUGUST 26th 1965,

Activity in the above area has been rather low in the past three months, as we suspect it has been elsewhere. The reason probably being poor weather conditions as opposed to a real decline in actual activity. The few more positive reports we have received this time have not been substantiated by other witnesses.

The following are the most reliable reports received to date:

On a Saturday morning in July or August 1977 (Witness not too sure of exact date) at 9.10am. Mr. Derek Wood and Mr. Christopher Wood awoke and upon looking out of their bedroom window observed an object in the sky. He describes it as a solid silvery colour, and in a diagram shows a diamond-shaped object. He says that when he first observed it, it was stationary, then after changing position about three times, suddenly pointed straight up. In Mr. Wood's own words, 'it pointed upwards and sort of climbed up the sky away'. Mr. Wood says the object was there when he awoke and he watched it for about $\frac{1}{2}$ to 1 hour. He is not exactly sure but guesses that the object would have been 10 to 20 miles away. Below is a sketch as supplied by Mr. Wood. He assesses the size of the object as being that of a pea or 1 new penny held in the hand at arms length. The edges of the object being like a bright star.

Readers of the Christmas edition of this magazine may recall we featured a similar account in our report. The object was almost identical in shape and on that occasion the witness watched the object for at least half an hour. This object also shifted position before disappearing behind a small greyish cloud.

On Monday 29th August 1977 at 11.30 pm. or just after, Mr. Stephen Wild was walking along Wildhouse Lane towards Milnrow when he saw an object which he described as being as bright as a street lamp. The object appeared solid, and orange in colour. The object was moving all the time it was in view, though Mr. Wild said he left before the object disappeared from view to find a witness. Below is a sketch of the object seen by Mr. Wild. The object was in view for about five minutes.

On Saturday 16th 1977, Mr. F. C. Webb, of Newney, Rochdale was in his garden when he, together with his wife, saw what he described as a bright object with a ruby glitter. The time was 9.00pm. Mr. Webb is not sure whether or not the object was behind light clouds but the light was intermittent with a star-like quality and may have been giving off smoke or vapour. The object was travelling in a Westerly direction at what Mr. Webb describes as over Sub-sonic speed.

ROCHDALE AND DISTRICT UFO RESEARCH GROUP. (CONTINUED)

On December 27th 1977, the organizer of the above group was at home watching television, when just after 7.30pm there was a knock on the door. Here is the account in Mr. Burt's own words: On hearing children's voices and then a knock on the door, I thought it rather late now for carol singers. However, I opened the door to find a small boy of around nine years old standing there. He appeared surprised at first as he had forgotten what it was he had knocked for. Then in a rather deep voice he asked "excuse me, have you got the right time please?" I looked at my watch which read 7.30pm and told the boy who then thanked me and began to walk away. I felt there was something strange. With the boy was another younger boy about seven years old and a little girl of about five or six. They both looked back at me and proceeded to walk away back in the direction to which they had come. I was sure of this as their voices were heard to pass under the window. As they disappeared (not literally) round the corner, I suddenly looked up to see a brilliant white light come across the sky in an Easterly direction. It can only be described as a flying light bulb. The sky was fairly clear with just some very light, high cloud. The object was well below cloud, very low in fact, and after about ten seconds in view the object just vanished as if switched off. Although there were very light clouds well above where the light had been, no shape could be distinguished below the cloud after the light had gone out.

There has been no confirmation of this sighting from any other source but it was witnessed by one other person with myself. I will never understand what compelled me to stand at the door, what must have been two to three minutes from the time I answered the door to sighting the object. It is interesting to note also that there were about ten other children playing on skateboards across the street directly beneath the path of the object, yet not one of them seemed to notice it."

On the 12th January, 1978, Mrs. Stephanie Brady, of Rochdale was in Holmes Street at 6.2tpm., when she observed a sphere-shaped white light. The sky was very clear. Mrs. Brady was accompanied by her husband who also saw the object. There was apparently an aircraft in the immediate area which was heard and identified by the usual lights. The aircraft was moving much slower than the object at about the same height. Mrs. Brady says she and her husband both looked away for a second and when they looked again the object had disappeared. Although the aircraft was still visible, the object was in view for approximately 10 seconds.

On the 26th January 1978, Mr. C. Daubney, of Oldham, Lancs., was in an upstairs room of his home at 12.50am, when he saw the following: "Four large clear lights when first observed, alternating red and sodium when stopped." The object appeared solid and the distant clouds formed a white background when the object stopped. The sky was very bright due to moonlight. The edges of the object were sharply outlined by lights. Mr. Daubney estimated the size of the object as being of that of a beach ball held in the hand at arms length. The object was travelling first South East then South. The object was in view for 15 minutes, when it moved rapidly straight up into white wispy clouds. The sighting was witnessed by Mr. Daubney's wife and 17 year old son.

Martians....(To be or not to be)

So they have landed sophisticated instruments on Mars and have come to the conclusion that the planet is not much to write home about. Nothing much there save an abundance of sand, rocks, cliff faces of enormous proportions, huge craters and dried up river beds or what would appear to have been so. Is this the official NASA philosophy? What have their laboratories come up with of late,? we should love to know. A miscalculation could be tragic. An abundance of data has been offered to the contrary, but we are faced with a dilemma.. we cannot accept the fact that beings from other worlds could resemble us; that they would, think as we do is inconceivable. It seems logical to most of us to assume there would be little if anything in common. We find incredible the suggestion that they might be able to master our languages, even though we ourselves have machines that translate tongues. Yet when reports of intelligently controlled objects are made by many reliable witnesses, they are denied on the basis that they are incredible and therefore false. But why are they incredible? BECAUSE they are Not like us. They travel too fast, they don't suffer the limitations we suffer in our battle with gravity, they make sharp angled turns. They are sometimes solid and sometimes ghostlike; sometimes they disappear then reappear as if by magic. Sometimes they register on radar.. at other times they are only seen. The unforgivable difference is of course the fact that they don't land(say the sceptics) or the ones which do land cannot be believed in because they are simply Too human..... they resemble us. Therefore, it is not possible to believe in the presence of extraterrestrial beings, for the simple reason that if they are like us it is ILLOGICAL; if they are different and therefor unbelievable, evidence doesn't enter into the picture. How much reasoning is involved in the belief that if a being is seven feet tall, or three feet tall or of varying skin pigmentation he is less than Human.....that is subhuman?How arrogant are many of Earths offspring indeed.

This then, is Mars. We know, by reasoning, that Mars cannot be like Earth.... ...it's further from the sun. Its smaller and it's gravity is less; it's air is thinner, so we reason how it SHOULD be and then instruments tell us it is this way... ..and when it is told often enough WE BELIEVE IT. So it reasons out that there could therefore be no Martians because they would have to be like us, so, we freeze in such temperatures as our instruments tell us, so they would freeze too. Yet we supposedly began on the assumption that Martians can't be like us because their environment is different. Long drawn out arguments and investigations are carried out. It is found that a rare specimen of lichen on Earth has survived Artic Temperatures. Theories are revised. It is now respectable to accept that there may be a primitive form of life on Mars....the final conclusions of the Biophysicists are still eagerly awaited from NASA.

People who look at Mars through their telescopes have reported new green areas stretching out across the deserts. These inconsiderate green areas on Mars insist upon expanding in a most suspicious way. When the snow melts, they get larger... when spring comes they become green, in the Autumn... grey. An area immense size pushes out into the desert. Since we have previously insisted that Martians freeze and probably boil when we boil, let us now imagine the conditions for a meadow the size of Texas in the USA to thrust it's way out into the Sahara. We have imagined it. It is now necessary for there to be more moderate temperatures on Mars. Therefore, we find that the atmosphere has a greenhouse effect and somehow holds more heat. The temperatures on Mars are no longer incompatible with Life, but by this time intelligent life is simply a sneer word, and not to be mentioned in orthodox and polite society. There is no reasoning involved.....it is simply that we continue burying our arrogant heads in the sands. I'm sure the inhabitants of the planet Mars, whatever their form enjoy a quiet laugh. at our expense.

U.F.O. Film.

I would like to thank Barry for arranging for us to see United Artist's screening of Project Sign, Grudge, and Blue Book, at The Grand Cinema Frome on Friday 27th of January 1978. The film which was in black and white, and colour was authentic and true. It is a great pity it is not on general release to the public. I found it extremely interesting.

During the screening we were shown a length of colour film lasting only a few seconds, of two large white shining objects flying across the blue sky and the U.S.A.F.'s analysis of the film. A further colour film was shown in which fourteen bright white U.F.O.s flew across a clear blue sky overtaking each other, flying in spiraling circles making what appeared to be geometrical patterns. At one point the film was frozen for us to study the objects in a close perspective. At this point the objects resembled closely the star pattern of the Plough. The analysis report was extensive, but in brief, they are. Not birds, Not planes, Not Balloons, and Not anything else one could think of. In fact to this day these films remain a complete mystery.

Toward the end of the film we were shown a number of U.F.O.s on radar flying around Washington at vast speeds. Two U.S.A.F. jets were scrambled to investigate, but as soon as they were seen approaching on the radar screen, the U.F.O.s disappeared. The jets were then recalled to their base. Then the incredible happened. The U.F.O.s reappeared again and the jets were again scrambled. As they were seen on the screen, each jet was deployed to a separate quadrant. The pilots were asked if they could see anything. One of the pilots reported he could see them, and that the U.F.O.s were coming straight at him. The radar screen showed six solid blips surrounding the jet as it flew across Washington. One of the blips moved in close to the jet till both blips almost merged into one. After a few moments the U.F.O.s were seen to move away from the jet in a radiating circle and then again disappeared from the screen.

I must add again, the films and reports shown in this film are authentic and true, and backed up by high ranking U.S.A.F. officials. To date seventeen countries have admitted that U.F.O.s exist. The questions being asked now is where do they come from, why are they here, and what are they doing?

These questions of course have been asked before, now they must be looked at seriously.
